EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Timothy Czaja on June 27, 2005.

The application has been amended as follows: **cancel** claims 16-19

Claim 7, line 5: replace "approximately" with - -approximate- -

2. The following is an examiner's statement of reasons for allowance: the prior art fails to disclose or render obvious a method of isolating a newborn calf from the calf's mother including the steps of providing a rigid pen having an open floor, attaching the pen to a motorized vehicle, driving the vehicle and raised pen to the area where the calf is located, and lowering the pen onto the ground. Prior art references teach using vehicle mounted catchers such as Hoffman, US Patent 3,931,796. While Hoffman discloses a vehicle-mounted catcher, the catcher used does not raise and lower the pen but entraps the animal by encircling the animal, not by lowering a pen on top of the animal. Prior art devices do disclose the use of lowering a containment apparatus on top of an animal such as Braun, Jr., US Patent 5,291,857. However, Braun does not disclose attaching the device to a motorized vehicle as it is clearly stated that the device is manually lifted in a medical testing facility.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
